Important Health Warning About Playing Video Games

Photosensitive Seizures
A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; and do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.
**THE TOURNAMENT BEGINS ANEW**

Just as the excitement of the previous, now legendary tournament finally fades, word of a new world fighting tournament spreads like wildfire among martial artists across the globe, trailing a series of bizarre rumors along behind.

The mysterious disappearances of numerous famous fighters. A terrible threat in the form of a new, deadly secret weapon. The possible connection between S.I.N., the sponsor of the new tournament, and the supposedly destroyed Shadaloo.

New fighters also step up and make themselves known, almost as though responding to these troubling rumors.

A young man who searches for his lost past. A female agent with the potential to be an executive member of S.I.N. A man who burns with the desire to defeat his greatest rival. A Luchador who seeks the ultimate recipe.

Before these newcomers stand those from the previous tournament, each bringing their own renewed determination.

Some fight for those dear to them. Some fight to finally take their revenge. And some fight simply so that the entire world will chant their name.

A complex clash of human relationships and the truth of a terrible plot that lurks behind the championship.

This is the chaos that Ryu, who has been honing his skills with the simple goal of becoming the ultimate fighter, one beyond the constraints of mere mortality, now finds himself thrown into...

Amid pursuit and escape, friendship and betrayal, the curtain rises on a new stage of battle!

In order to play the game, it must be installed.

Before installing, confirm the machine’s operating environment one more time.

Turn on the computer’s power and insert the “Street Fighter IV” DVD-ROM into the DVD-ROM drive.

When the Launcher Screen is displayed, click on “Install” to begin installation.

If the Launcher Screen does not automatically appear, double click on the DVD-ROM drive icon under “My Computer” and then double click on “Autorun.exe” to get to the Launcher Screen.

When playing this product, quit all other applications. If other applications are in use, it may cause an error to occur. Also, do not perform “Switch to other applications” by pressing on [Alt] + [Tab] when in Full Screen Mode. In some cases, it may become impossible to return to the game.

Click on “Finish” to finish the installation.

After reading the User Agreement, place a check next to “I accept the terms in the license agreement” and click on “Next”.

(If you do not agree to all the terms of the User Agreement, you cannot install the game.)

Enter the Live Access Code (see manual back cover) and choose the optional installation method.

The default setting installs the program in “C:/PROGRAM FILES/CAPCOM/STREETFIGHTERIV/J.

If you select “Change”, you can change the install destination folder to the folder of your choice.

When you are done with the settings, click on the “Next” button.

When ready to install, please click on “Install”, and begin to copy the file.

Click on “Finish” to finish the installation.

In the case of Windows Vista
To start up Street Fighter IV, from the Start button, go to “All Programs” > “Game” > “Game Explorer” > and then click on “Street Fighter IV”.

In the case of Windows XP
To start up Street Fighter IV, from the Start button, go to “All Programs” > “Capcom” > and then click on “Street Fighter IV”.

When playing this product, quit all other applications. If other applications are in use, it may cause an error to occur. Also, do not perform “Switch to other applications” by pressing on [Alt] + [Tab] when in Full Screen Mode. In some cases, it may become impossible to return to the game.

Select Control Panel from the Start button and use the “Add or Delete Program” function.

Games for Windows – LIVE
Games for Windows – LIVE and Xbox LIVE® are part of the first and most comprehensive online entertainment network in the world, uniting gamers on Xbox 360® and select Games for Windows – LIVE titles. The LIVE service connects millions of gamers in 25 countries, making it easy for gamers to find friends, games, and entertainment on either platform. When you become a member of LIVE, you can see your Friends’ games and activities, communicate with other members, and track gaming achievements. Become a Gold member to receive additional benefits, such as sending and receiving invitations to multiplayer games. Go towww.gamesforwindows.com/live for more information about LIVE and availability of LIVE in your region.

Connecting to LIVE
To connect to Games for Windows – LIVE, you need a high-speed Internet connection and a gamertag. If you already have a gamertag, you have what you need to connect to Games for Windows – LIVE. If you don’t have one, you can get one for free. To sign in or sign up, launch the game, then press the Home key. For more information, go to www.gamesforwindows.com/live.

Family Settings
Family Settings in Games for Windows – LIVE complement Windows Vista® parental controls. Manage your child’s access and experience with easy and flexible tools. For more information, go to www.gamesforwindows.com/live/familysettings.
To set the 2P controls, you need either one or 2 controllers.

In the case of 2 controllers, press the START button on the 2P controller when the message, “Press the START button on the controller to be used” message appears.

In the case of 1 controller, 1P will use the keyboard and 2P will use the controller.

Using the option, “1P Device Setting,” select the setting so that the device used by 1P is set as “Keyboard only.”

When the 2P controller becomes operable and the message, “Press the START button on the controller to be used” is displayed, press the START button on the 2P controller.

**THE GAME SCREEN**

1. **Points and Consecutive Number**
   - This number shows the current earned points and number of consecutive wins in Versus Mode or Games for Windows – Live Battle. Different information is displayed depending on the mode.

2. **Vitality Gauge**
   - This gauge displays your currently remaining vitality.

3. **Time Counter**
   - The remaining battle time.

4. **Win Markers**
   - Displayed after winning a round. The icon shown changes depends on the exact circumstances of your victory.

5. **Character Portrait**
   - The character you are currently using.

6. **Super Combo Gauge**
   - Once this gauge fills up it can be used to perform Super Combos or EX Special Moves. (P.19-20)

7. **Revenge Gauge**
   - Once this gauge is at least 50% full, you can use it to perform an Ultra Combo. (P.21)

8. **Bonus Message**
   - Various messages are displayed here according to the in-game action.

9. **Status**
   - An icon is displayed when the Arcade Fight Request setting is turned on.
**Rules of Combat**

**Match Setup**
The default setting is three round matches, with the first fighter to win two rounds declared the victor.

**Winning Rounds**
A single round lasts for a maximum of 99 on the time counter. Reduce your opponent’s Vitality Gauge to 0 within that time for a win by KO. If the time runs out then the fighter with the most vitality remaining will be declared the winner.

**Anchors**
A draw occurs when both fighters’ vitality falls to 0 simultaneously or their remaining vitality is exactly the same when the time runs out. If the final round of a match ends in a draw then it is game over.

On the character select screen you choose and customize a character to play as. Select a character and the customize window will open. Alter settings with the keyboard cursor key (D-pad) and confirm with the A key (A button).

**Costume**
Purchase costumes from the LIVE Marketplace and you can then use them on the corresponding character.

**Color**
Change the color of the character’s costume. You initially have access to two colors, but you will unlock more as you progress through the game.

**Personal Action**
Select the Personal Action (P16) that the character can use to taunt opponents during battle. To begin with, characters only have one Personal Action, but as you make progress through the game the number of selectable Personal Actions will increase.

**V. Comment**
Select the message that is displayed when you win a match. There are 11 pre-set messages for each character. If you do not make a selection, one will be displayed automatically.
All of the controls shown in the basic controls section are for when your character is facing the right. When facing the left, all left/right controls should be reversed.

**NORMAL MOVES**

Press the punch or kick buttons to perform normal moves. The actual attack performed depends on the position of your character and the button pressed.

**SPECIAL MOVES**

Inputting a specific combination of directional and attack buttons allows you to perform a special move. Even if your opponent blocks a special move, they will still take a small amount of damage. Inputting the command for a special move during certain normal moves allows you to cut short, or “cancel,” the normal move and quickly go straight into performing the special move. Using cancelling skillfully is one way to create damaging combinations.

**BLOCK**

Pushing the keyboard cursor key (D-pad) away from your opponent allows you to block their attacks. You can block high (standing) and low (crouching) attacks. High and low blocks can block specific attacks, but not every attack. You will need to carefully and quickly swap between them to block all incoming attacks. You cannot block while in the air.

**DASH**

Press the keyboard cursor key (D-pad) twice quickly forward to perform a forward dash, or backward twice to perform a backward dash. Dashing allows you to quickly close the distance between you and your opponent, or to fall back and reassess the situation.

**STUN RECOVERY**

If you keep getting pummeled, you will eventually become stunned. While stunned, you cannot do anything. Your only hope is to press the keyboard cursor key (D-pad) and other buttons as fast as you can to recover from the stun faster.

---

**BONUS MESSAGES**

The following messages will appear on the screen when certain conditions are fulfilled.

- **TECHNICAL**
  - Displayed after performing a successful quick standing recovery or throw escape.

- **REVERSAL**
  - Displayed after performing a special move, Super Combo or Ultra Combo in the specific situations described below. Perform a reversal with a beat down attack and it will take on Armor Break properties, nullifying Hyper Armor. (Please refer to P.17)
    - In the instant you can move again after recovering from taking damage, blocking or being stunned.
    - In the instant after performing a recovery or getting up from being knocked over.
    - In the instant you land after being sent flying backward but not actually knocked to the ground.

- **COUNTER**
  - A counter hit occurs when you interrupt an opponent’s attack with one of your own. Your opponent will take longer to recover from the damage caused by a Counter Hit, making it possible to perform combinations that are otherwise impossible.

- **FORWARD DASH**

- **BACKWARD DASH**

---

---
**Basic Controls**

**THROWS AND THROW ESCAPES**

When standing close to your opponent, pressing the light punch and light kick buttons simultaneously allows you to throw your opponent. You can change the direction you throw the opponent by pressing the keyboard cursor key (D-pad) left or right. You can prevent yourself from being thrown by pressing light punch and light kick together when your opponent begins to throw you. This is called a “throw escape.”

* Some characters can also perform a throw when jumping (aerial throw), or special move throws (command throws). Throw escapes cannot be performed against aerial or command throws.

**RECOVERY**

When your opponent’s attacks have knocked your character to the ground, you can either press the keyboard cursor key (D-pad) down or any two buttons together in the instant that you hit the ground to perform a quick recovery. A successful recovery will reduce the amount of time spent prone on the ground and make it easier to respond to the next incoming attack.

* Some attacks, such as throws, do not allow a recovery to be performed after them.

**PERSONAL ACTION**

While standing, you can press the heavy punch and heavy kick buttons together to make your character perform a personal action and taunt your opponent. This action in and of itself has no special properties.

**FOCUS ATTACK**

**PERFORMING A FOCUS ATTACK**

Press and hold the Medium Punch and Medium Kick buttons together to charge up a Focus Attack. To perform a full strength Focus Attack, hold the buttons until the attack is unleashed automatically. If you release the buttons while charging, the Focus Attack will come out sooner, but weaker.

**HYPER ARMOR DURING A FOCUS ATTACK**

You can absorb up to one enemy attack in the time between pressing the Medium Punch / Medium Kick buttons and the Focus Attack being performed. You can then go on to counter by performing the attack.

* This method is not effective when your opponent uses an attack with the “Armor Break” property.

Absorb an opponent’s attack and, rather than take direct damage, a section of your vitality gauge will change color, and will then regenerate over time. This damage will recover as time passes, but if you are hit again before it finishes recovering, the remaining section will vanish and can no longer be recovered.
Basic Controls

Levels of Focus Attack

There are three levels of charging for a Focus Attack. The levels depend on how long you hold the Medium Punch and Medium Kick. Your character will flash white each time the Focus Attack level increases.

<table>
<thead>
<tr>
<th>Attack Level</th>
<th>Main Benefits of Focus Attack Performed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 1</td>
<td>• Only does regular damage</td>
</tr>
<tr>
<td></td>
<td>• Crumples opponent if a counter hit</td>
</tr>
<tr>
<td>Level 2</td>
<td>• Crumples opponent if hits, allowing easier follow up</td>
</tr>
<tr>
<td>Level 3 (Keep Holding</td>
<td>• Becomes unblockable</td>
</tr>
<tr>
<td>Until Performed)</td>
<td>• Has Armor Break properties</td>
</tr>
<tr>
<td></td>
<td>• Crumples opponent if hits, allowing easier follow up</td>
</tr>
</tbody>
</table>

When an opponent crumples, they are rendered totally defenseless as they fall to the floor. Follow up with extra attacks or a throw to take advantage of a crumpled opponent and do further damage.

Focus Attack hits! Follow up!

Other Actions During a Focus Attack

You cannot move or jump during a Focus Attack, but you can perform either a forward or backward dash to cancel the Focus Attack quickly.

Super Combo

Hitting your opponent or performing special moves will increase your Super Combo Gauge. The gauge is divided into four segments and, when completely full, a special command can be inputted to perform an all-powerful Super Combo. Doing so will use up all of your Super Combo Gauge. (P.45 onward for Super Combo commands)

Input the Super Combo command while performing a normal move or special move and you can cancel and move directly into the Super Combo. This is called a “Super Cancel.”

Using Super Cancels strategically allows you to chain a normal move into a special move, and then into a Super Combo for massive amounts of damage.

EX Special Moves

You can also perform an EX special move by pressing two or more of the required buttons (punch or kick) when inputting a special move command. This will consume one segment of your Super Combo Gauge. EX special moves are further powered up versions of your normal special moves.

Example: Ryu’s Tatsumaki Senpukyaku

Super Combo Gauge

Super Cancel

EX Command
**Basic Controls**

**EX Focus**

When performing certain regular or special moves it is possible to press Medium Punch and Medium Kick together and cancel into a Focus Attack. This is called “EX Focus.” (It will consume two segments of your Super Combo Gauge.) EX Focus has the same properties as a regular Focus Attack, aside from having no Hyper Armor effect.

Example:

1. **In the instant that Ken’s Shoryuken hits press Medium Kick and punch together**
2. **EX Focus is activated**
3. **Immediately perform a forward dash to cancel the Focus Attack**
4. **Follow up with another Shoryuken!**

You can also use EX Focus when your special moves are blocked to protect yourself from your opponent's counterattack.

Example:

1. **Ken’s Shoryuken has been blocked**
2. **Wary of opponent’s counterattack use EX Focus to cancel the Shoryuken**
3. **Then perform a backward dash to get away from the opponent**

**Ultra Combo**

The Revenge Gauge fills up as your opponent damages you. Once it is over 50% full, you can input a character-specific command to perform an “Ultra Combo,” a devastating special move.

Performing an Ultra Combo will consume the entire Revenge Gauge. The higher the gauge is charged upon performing the attack, the more damage the Ultra Combo will do.
**Game Modes**

**Arcade Mode [For 1 or 2 Players]**

In this mode, you select one character and then fight through a series of CPU opponents. There are eight levels of CPU character difficulty, from [EASIEST] up to [HARDEST]. If you are defeated along the way, you can still continue. If you are using 2 controllers, or using the keyboard and 1 controller, you can challenge the other player by pressing the START button of the other controller. To challenge, you must turn OFF the “Request Settings”. (P.29)

**About Arcade Waiting Mode**

When Request setting is ON, you can play Arcade Mode while waiting for others to join in Games for Windows –Live Battle. If someone applies to join Games for Windows –Live Battle, a message will be displayed and you will enter Games for Windows –Live Battle Mode.

**Versus Mode**

In this mode, you can select a character, a stage, and fight against a CPU or human opponent. You can also select a handicap according to skill. “PLAYER VS PLAYER” can only be chosen when the controller is connected.

- **Player vs Player**
  - Two human players can enjoy versus play.

- **Player vs CPU**
  - Fight against CPU characters.

- **CPU vs CPU**
  - Watch two CPU characters fight each other.

**Games for Windows –Live Battle**

By using Games for Windows –Live Battle, you can battle with others online in rank matches or player matches. Align the keyboard cursor key (D-pad) to select from the following menu and then press the A key (A button) to decide.

- **Ranked Match**
  - Result of the match will be reflected in leaderboards.

- **Player Match**
  - Result of the match will not be reflected in leaderboard.

- **Championship Mode**
  - Compete for the championship by battling one network battle opponent after another in a playoff-style competition. (P.30)

**WHEN THE BATTLE ENDS...**

When the match ends the result screen is displayed here. Medals and battle points will be awarded (Ranked Match only).

**MEDALS**

“Medals” can only be obtained by winning Network Battles. You can obtain titles and icons by acquiring Medals.

**GAMES FOR WINDOWS –LIVE BATTLE SCREEN**

In addition to the normal Game Screen (P. 11) displayed during Network Battle play, each player’s Gamer Tag is also displayed.

**BATTLE POINTS**

Battle Points (BP) are a representation of a player’s strength. These points are increased by fighting Ranked Matches.
### Game Modes

#### Leaderboards

If you select “LEADERBOARDS” on the Games for Windows –Live Battle Mode Menu Screen, you can check the Ranking Data for each mode, such as the Games for Windows –Live Battle ranking and the “Challenge Mode” score ranking and the like.

Replays can be watched from Championship Mode and New Replays. (P.36)

#### About Transmission Status

You can confirm your partner’s transmission status by viewing their icon in the Lobby Screen or the Search Results Screen. 5 stages of transmission status are displayed.

- **When transmission status is good**
  - The optimum connection.
- **When transmission status is poor**
  - The worst possible connection.

#### About Network Disconnections

“Disconnect” indicates a network disruption and is displayed when a Network Battle ends in an abnormal fashion. In this case, data is automatically saved and added to the record of if not intentionally.

#### Customize Your Status!

By gathering medals in Games for Windows –Live Battle and winning in Challenge Mode, you can earn titles and icons. You can use titles and icons when you customize your status, so play all the various modes to try to earn them. You can display the Edit Status Screen by pressing Right [Ctrl] (button) on the Main Menu.

Customized titles and icons are displayed on the Waiting Screen when doing Games for Windows –Live Battle.

When the “Request Settings” or ON, you can wait for Games for Windows –Live Battle partners while playing Arcade Mode.

- **Waiting: OFF**
  - No matches can be accepted. Do not accept challenges from other players.

- **Waiting: Player Match**
  - Player Matches can be accepted.

- **Waiting: Ranked Match**
  - Rank Matches can be accepted.

- **Waiting: Championship**
  - Championship (matches) can be accepted.
**Game Modes**

**Championship Mode**

Championship mode is a mode in which you compete for the championship by battling one network battle opponent after another in a playoff-style competition. Depending on the Championship Grade that you take on, the number of matches needed to win increases.

**Grade Points (GP)**

When you enter the higher ranks in Championship Mode, you earn GP. GP indicates a player's strength and by earning more, you go up in rank.

**Championship Points (CP)**

CP is the Championship evaluation score and it is derived from the total GP value of the participating players. The stronger the competitors in a championship, the higher the CP becomes and this is reflected in the ranking.

**Types of Championships**

There are 4 grades of championships depending upon the player's abilities. When a player's rank goes up, he/she can compete in higher ranked championships. In Free Championships, all players can compete regardless of their rank.
