Note:

The Title also supports Keyboard and Gamepad apart from the Xbox 360 controller. User can select the device as Keyboard from the Controller settings and assign the specified keys. The game also takes input from Gamepad and the user can select the device as Gamepad from the Controller settings and works in the similar fashion as that of the Xbox 360 controller, but the button prompts will always display as that of the Xbox 360 controller regardless of the device selected to play the game.

Also a Graphic settings option is available, wherein the user can select the desired resolution, aspect ratio, Supersampling and also start the game in Windowed mode.

The options 'Controller settings' and 'Graphic Settings' are available to the user on the Launcher screen.

MAIN MENU

To begin your ninja adventure, press the  button on the Title Screen to access the Game Mode Select screen. While in the Game Mode Select screen, select to enter Ultimate Adventure, Free Battle, or Online Battle. You can also press the  button to save your game, or press the  button to open the Options menu. There, you can change your Control Settings, adjust the center position of the game screen, set preferred volume levels, change voice settings to Japanese or English, turn Violent Imagery On or Off and toggle subtitles.

NOTE: Any unsaved progress will be lost upon returning to the Title Screen.

ULTIMATE ADVENTURE

Experience the world of NARUTO SHIPPUDEN: Ultimate Ninja STORM 3 Full Burst as never before! Fight in key battles from throughout the series and explore the world of NARUTO as you meet new friends and foes, acquire various items, and enter key battles to grow as a warrior. Ultimate Adventure is comprised of cutscenes, battles, and Free Movement sections. To skip a cutscene, press the  button to pause the video and select YES.

HERO OR LEGEND?

At certain points in the story, you are faced with an Ultimate Decision opportunity and must choose your path: Hero or Legend. The Hero path is less difficult but yields fewer rewards, while Legend is more difficult but allows you to use more powerful items. Each path has its own Ninja Tools Palette, and certain Battle Items may only be equipped in one or the other. You can upgrade each respective palette to unlock more Battle Item slots (to a maximum of four) by earning Hero or Legend experience.

INTERACTIVE ACTIONS

Allies may appear to assist you during certain battles. Successfully input the button command that appears on screen to earn stars. Input button commands quickly to increase the number of stars you earn.

If you miss a button input, your character is damaged or penalized and you have to try again. If a special Bonus Input appears, complete it to earn a number of stars without fear of failure.

SECRET FACTORS

Secret Factors are hidden videos that play if you collect enough stars during an Interactive Action. These are hidden throughout various battles that appear in Ultimate Adventure mode. Can you win them all?

SECRET ACTIONS

When a mark appears at the top of the screen during a battle, it means there is a Secret Action hidden somewhere nearby. Use the icon as a hint to find and perform the Secret Action, and trigger a set of Interactive Actions. Press all of the buttons as they appear to complete the scene.

FREE MOVEMENT

In between battles, you can freely explore the world of NARUTO, interact with its inhabitants and buy new Battle Items or Collectables. A map in the upper-right corner of the screen shows your immediate surroundings. You can also press the  button at any time to view the Area Map.

To interact with an object or person, approach the target and press the  button. There are three types of interactions, indicated by the icon above a person's head. A talking head means you can simply talk to that person. An exclamation point icon means the main story advances if you talk to that person. A purple kunai icon means that person has a Mission for your character. Complete Missions to earn rewards!

You can investigate or break some environmental objects, like crates or pots, by pressing the  button. You may find valuable items inside these objects, or you could run across unexpected danger.

SAVING

You can manually save your game by interacting with Bird Houses stationed throughout the world. On your map, look for the green icon to locate a Bird House.

MERCHANTS

Free Movement areas feature several different merchants who can sell you various Ninja Tools and Collection Items. Move the left stick  to highlight an item, and  to set the amount of items you need. Press the  button to confirm your purchase. Use coupons found by completing bonus objectives during a battle to get discounts on your next purchase. You can expand the inventory of every Merchant by bringing back Blueprints found during your adventure.

PAUSE MENU (FREE MOVEMENT ONLY)

Press the  button during Free Movement sections to access the Pause Menu. Your current Health, Ryo, objectives, and the amount of time you have played are displayed at the top of the screen.

EVENT DETAILS

Select this option to view the details of your current mission or active requests. You may also view the details of any completed missions or requests.

NINJA WORLD TIMELINE

The Ninja World Timeline chronologically details key points in the NARUTO SHIPPUDEN: Ultimate Ninja STORM 3 Full Burst history. You may select and replay any previous battles from this menu.

ITEM LIST

Organize your Battle Items or just take a look at what you've acquired. You may also equip your Legend or Hero pallets and view your current number of experience points in both categories.

MAP

View a world map and get current information on the main story.

COLLECTION

View any Collection Items purchased from General Store Bandai, including: Ultimate Jutsu videos, music, Ninja Info Card pictures, Titles, and Substitution Items. Purchasing items from General Store Bandai requires Ryo, which is earned by finishing battles with a high ranking or completing missions during Free Movement sections.

TUTORIAL

This menu displays a list of all in-game tutorials.

FRIENDS LIST

View information on characters you can take on your adventure as friends, including your current friendship level status and background info. This is also used to send and receive mails from your friends.

FREE BATTLE

Within Free Battle, you can participate in four different game types or create matches according to customized rules.

VS BATTLE

Engage in Team Match or Single Match bouts against a computer-controlled opponent or friend. You can set up your favorite grudge matches with 1P VS COM, 1P VS 2P, or COM VS COM.

TOURNAMENT

Enter a tournament with 1-8 players. Select FREE TOURNAMENT to choose each character participating in the tournament, or PERPETUAL CHANGE TOURNAMENT to enter a tournament that has special conditions set before each match. You can also choose CHALLENGE TOURNAMENT to participate in a series of pre-selected tournaments or varying difficulty levels. Tournaments are organized into Cups, and you must finish the currently available Tournament Cup before the next one is unlocked.

NOTE: Only two controllers are required when playing offline.

PRACTICE

Create the ideal set of challenges to hone your skills in whatever situations you can imagine. After choosing between Team Match or Single Match types, use the Character Select menu to determine who will square off, or press the  to tweak individual Training Settings ranging from starting health and Chakra gauges to more advanced options. Also Practice settings can be changed during a battle by pressing  button and selecting practice settings. The default setting for the COM is to simply stand around and take your punishment, but by selecting COM SETTINGS, individual behaviors can be modified.

SURVIVAL MODE

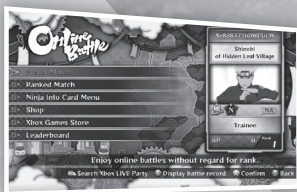

In this mode, challenge the survival battle with the carried over health (with just one health bar with multiple opponents). However this mode will not be available at the start of the game it will be unlocked after completing Battle Champion sub event of Adventure Mode. Participate in pre-selected Courses of varying difficulty. Select varying difficulties BEGINNER SURVIVAL, INTERMEDIATE SURVIVAL, ADVANCED SURVIVAL and ULTIMATE SURVIVAL.

ULTIMATE SURVIVAL will be unlocked after completing all the courses in INTERMEDIATE SURVIVAL and ADVANCED SURVIVAL

ONLINE BATTLE

Test your abilities against other players from around the globe in Online Battles. Fights are split into two main categories: **Player Matches**, which are played for fun and practice, and **Ranked Matches**, where each win and loss affects your ranking.

Before beginning a match press the **RB** button to view any incoming invites from other players. You can also press the **X** button to view your **Battle Record**, which lists everything from wins and losses to the number of **Battle Points** (and **Custom Battle Points**) earned and favorite characters used. Any tournament results and your overall disconnect rate is also logged, so other players know if you frequently disconnect in the middle of fights.

PLAYER MATCH

Select **PLAYER MATCH** to enter a single one-on-one match, or select **ENDLESS** to fight a series of opponents. You can also select **TOURNAMENT** for four- and eight-player bracketed matches, where the winner takes home huge spoils.

Hosting a Tournament can lead to better rewards. To do so, select **CREATE SESSION** instead of joining a specific Tournament by selecting **SEARCH SESSIONS** or **QUICK MATCH**. Select **NINJA WORLD WAR MAP** to enter a Player Match, Endless, or Tournament game at random without setting conditions. Once the list of available lobbies is available, select one to enter, and then choose a match.

RANKED MATCH

Ranked Matches affect your ranking and **Battle Points (BP)**. Your BP amount changes after every Ranked Match. When you win a Ranked Match, your BP increases, as does your rank. Select **QUICK MATCH** to join the first available game, or **SEARCH SESSION** to search for available games. If you would like to start your own battle, select **CREATE SESSION** and wait for an opponent.

NINJA INFO CARD MENU

Select **NINJA INFO CARDS** to view a list of the cards you've exchanged with other players, or choose **EDIT NINJA INFO CARD** to customize your own card with the parts you've unlocked in **Ultimate Adventure** mode.

SHOP

The Shop in Online Battle is mostly the same as the **General Store** Bandai found in the **Free Movement** sections of **Ultimate Adventure** mode. Use **Ryo** earned during **Ultimate Adventure** to customize your **Ninja Info Card Picture** and **Titles**.

LEADERBOARD

View the current worldwide rankings of all **NARUTO SHIPPUDEN: Ultimate Ninja STORM 3 Full Burst** players. You can also see where you stand in the ranking list by pressing **START** button.

BATTLE SCREEN

CHARACTER

The portrait for your character appears in the upper-left corner of the screen, while your opponent's portrait (or second player's) appears in the upper-right.

SUPPORT CHARACTERS

When Support Characters are in use, their information appears below your selected character. The orange bar underneath their portrait indicates their readiness. Support Characters can only be brought in when their gauge has completely filled.

HEALTH GAUGE

When your health gauge drains completely, the battle is over. All characters begin with a green health gauge, and as damage is taken, the gauge drains and changes to orange. When enough health is lost, the orange color drains to a black background.

CHAKRA GAUGE

The blue bar beneath the health gauge shows how much Chakra you have. Many moves require Chakra; so make sure you keep a close eye on your reserve. Either pick up glowing blue Chakra Orbs knocked out of enemy players (or yourself) after big hits, or hold the **Y** button to build Chakra as well as absorb any nearby orbs. Keep in mind that you are vulnerable to attacks while pressing the **Y** button to build Chakra.

TIME LIMIT

The time limit counts down the remaining match time. When it ends, the player with the most health is the winner. In some modes, there may not be an option to set time limit.

BATTLE ITEMS

In the lower-left, mapped to each of the four directions buttons, are your available battle items. Battle items include recovery items, stat boosts, and thrown objects. The number in the lower-right corner of each of the items indicates the number of that item you have left to use.

SUBSTITUTION GAUGE

While under attack, press the **D** to perform the Substitution Jutsu to teleport away from your opponent, changing the tide of battle. This can only be performed a set number of times, so use it wisely. The number of times you can use the Substitution Jutsu is tracked with the substitution gauge. Once the gauge is empty, you can no longer perform the Jutsu. The gauge refills slowly over time.

AWAKENING GAUGE

When your health dips low enough (indicated by a mark on the health gauge), you can channel all your Chakra to perform an Awakening. Few characters can awaken at the beginning of the battle by moving the right stick in any direction. While characters are using their Awakening their attacks are more powerful and some characters gain new move sets. You can only use Awakening for a limited time, so make the most of it.

COMBO COUNTER

Combos are everything in these epic clashes; more successive hits means more combined damage. Keep an eye on the hit counter to see just how long a string of attacks you can build up.

Notis: Utöver Xbox 360-handkontrollen har spelet även stöd för tangentbord och andra handkontroller. Du kan ställa in enheten för kontroller till Keyboard (tangentbord) i Controller Settings-meny (kontrollinställningar) och tilldela specifika tangenter till funktioner. Spelet har även stöd för Gamepad (annan handkontroll), och du kan ställa in enheten för kontroller till Gamepad (annan handkontroll) i Controller Settings-meny (kontrollinställningar), och handkontrollen kommer då att fungera på liknande sätt som en Xbox 360-handkontroll. Notera dock att de knappanvisningar som visas i spelet alltid är samma som visas med en Xbox 360-handkontroll, oavsett vilken sorts annan handkontroll som används. Det finns även grafikinställningar tillgängliga, där du kan ändra inställningar för upplösning, bildförhållande, supersampling, och även ändra så att spelet startar i fönsterläge. Alternativen Controller Settings (kontrollinställningar) och Graphics Settings (grafikinställningar) är tillgängliga från Launcher-skärmen. (Startaren.)

SPARA

Du kan spara ditt spel manuellt genom att interagera med Bird Houses som finns lite på olika platser i världen. Håll utkik efter den gröna ikonen på din karta för att hitta ett Bird House.

Let op: De titel ondersteunt naast de Xbox 360-controller ook het toetsenbord en gamepad. In de sectie Controllerinstellingen kun je het toetsenbord inschakelen en de toetsen toewijzen. Ook een gamepad wordt ondersteund en in de controllerinstellingen kun je dit inschakelen. Dit werkt op dezelfde manier als de Xbox 360-controller, maar ongeacht de geselecteerde besturing zijn de getoonde knoppenaanwijzingen altijd die van de Xbox 360-controller. Tevens is er een optie voor de instelling van de graphics. Hier kun je de gewenste resolutie instellen, de beeldverhouding en Supersampling instellen. Ook kun je er de game in de venstermodus openen.

De opties 'Controller settings' en 'Graphic Settings' vind je in het Launcher-scherm.

OPSLAAN

Je kunt zelf je game opslaan bij een Bird House (vogelhuisje) dat je in de wereld vindt. Kijk op de kaart voor het groene pictogram van een Bird House.
