## Important Health Warning About Playing Video Games

### Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; and do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

INTRODUCTION

INTRODUCTION – THE DAWN OF AN AGE

It is the 41st Millennium, and there is only war. This war emerged from the Dark Age of Technology, when mankind spread itself from one side of the galaxy to the other in its quest for knowledge. Traveling in starships to planets far from Earth, they brought with them enlightenment and the best of intentions. But this expansion was not to go unchallenged.

The enemies of man, including the savage and bloodthirsty Orks, the mysterious and powerful Eldar as well as other dark and dangerous forces, wage constant war against the descendents of Earth, seeking to end their very existence. The lives of untold billions, indeed the very survival of humanity itself, depend upon the protection of the Master of Mankind, the Immortal Emperor.

He is the leader of this driven, fierce species, caught in a fragile dominance of more than a million worlds. As a race, humanity barely survives destruction, extinction and alien invasion. Only through brute strength and the singular vision of its celestial patriarch, the Emperor, does it escape destruction. By His will do vast armies of loyal, genetically perfected and lethal warriors known as the Space Marines accomplish his merciless bidding. Without him and the Space Marines, the Imperium of Man would crumble to the many scourges assailing it.

Ten thousand years ago, the Emperor ascended to the Golden Throne of Terra. Although genetically human, the Emperor is a living god and the savior of all humanity. Supremely gifted with extraordinary psychic abilities, he used his unparalleled power to unite billions of people. Today, this vast expanse of peoples is called the Imperium. It is ruled by the iron will of the Emperor; his body is entombed in the strange life-giving machinery of the Golden Throne for eternity, as his natural life gave out long ago.

The Emperor's power remains great. His mind is the beacon star to which all ships sail, whether through the material space or the Chaos-fed temors of the Warp. Without the Emperor's psychic beacon, the Imperium's vessels would lose their anchor in the unpredictable tempests of hyperspace.

SPACE MARINES AND THE GODS OF WAR

From the ten-thousand psykers of the Astronomican, who anchor the Imperium's starcraft in warp space, to the billions-strong Imperial Guard who defend the Emperor's worlds against alien threats and Chaos insurrections, to the Inquisition that protects the Imperium from within against the witch, the heretic and mutant through cleansing flame and large-caliber execution, the Emperor's forces are many and dreaded.

No servant, however, compares to the monolithic Space Marines of the Adeptus Astartes – the Emperor's will made manifest and avatars of his glorious retribution. They are genetically perfect and the symbols of his everlasting might. These gods of war are often all that keep humanity from falling to the alien conquest and internal heresies.

The Blood Angels, the Black Templars, the Space Wolves and the Ultramarines are but a handful of the illustrious thousand chapters who serve the Imperium.

The Undying Master of Mankind, the Emperor, is no longer merely a man; he has become a god, worshipped by billions throughout the Galaxy. As Man's enemies rain endless death and destruction upon humanity's doomed planets, the people of the Imperium pray to the Emperor, begging for his protection. Only Space Marines can answer their desperate prayers. As the Emperor's loyal soldiers, the Imperial Guard are the backbone of mankind's military. When these innumerable ranks are coupled with the fierce and unrelentingly heroic Space Marines, they represent humanity's last, best hope for salvation from their merciless enemies.

To live now is to live in the cruellest and most bloody regime imaginable. Forget the power of technology, science, and humanity. Forget the promise of progress and understanding. There is no peace amongst the stars. Life is a desperate struggle for survival. Vigilance and devotion to the Emperor are the only refuge against the enemies of man, and the Space Marines are the Emperor's hand.

ENTER THE BLOOD RAVENS

A secretive and ritualistic chapter of the Space Marines, the Blood Ravens have a glorious history of fighting heroically for the Imperium. Yet, unlike some of the chapters who can trace their lineage back ten thousand years to when the Emperor of Mankind created the first Space Marines, little is known of the Blood Ravens' origins. Their chapter records have long since been mysteriously lost...or destroyed.

As if to compensate for their lack of knowledge regarding their roots, the Blood Ravens have developed a deep respect, almost an obsession, for knowledge. They keep extensive records on all subjects, constantly adding to the chapter's well-organized archives with materials and artifacts gathered and cultivated based upon their belief that knowledge is the greatest weapon in the fight against the Emperor's enemies.

GAME CONTROLS

CAMERA CONTROLS

CAMERA MOVEMENT – To pan the camera, move the mouse cursor to the edge of the screen in the direction you wish the camera to move. The camera will move on its own. When you are satisfied with the location, move the cursor away from the screen edge. You can also pan the camera using the arrow keys on your keyboard or by using the middle mouse button and pulling the terrain in the direction you want to move it.

CAMERA FOCUS – To focus the camera on a unit, double-click with the left mouse button on that unit’s portrait in the squad tabs. The squad tabs are located along the right side of the screen.

CAMERA ZOOMING – To zoom the camera in or out, scroll up or down with the mouse wheel. Scrolling up zooms in and scrolling down zooms out. Press the keyboard’s Backspace key to reset the camera to the default view.

CAMERA ANGLE – To change the angle of the camera, hold down the Alt key on the keyboard and move the mouse around. To return the camera to the default angle and height, press the Backspace.

UNIT SELECTION

SELECTING A UNIT OR SQUAD – To select a unit click on the model or the unit’s decorator above his head with the left mouse button. Alternatively, you can click on the squad portrait on the right side of the screen or use the designated hotkey.

SQUAD PORTRAITS – Each squad has a portrait on the upper-right portion of the screen that lists important information about that squad’s status. You can see the health of each squad leader, how many members each squad has and what hotkey it is associated with. Click with the left mouse button on the Squad Portrait once to select it, and double-click with the left mouse button to center the camera on that unit.

UNIT INFOL PANEL – When you have a unit selected, the unit’s information and abilities appear in a panel at the bottom right of the screen. Use the icons along the top of this panel to trigger the unit’s special abilities.

SELECTING MULTIPLE UNITS – To select several units at once, click and hold down the left mouse button while dragging the mouse across the squads. Release the left mouse button when the box formed surrounds the squads desired.
Hot Keys – You can quickly select a unit by pressing the number on the keyboard of the hotkey associated with the squad you would like to select. For instance, the Force Commander is #1; to select him with his hot key, press the number 1 on the keyboard. Each squad’s hot key is indicated next to his squad tab on the right side of the screen.

USING YOUR UNITS

MOVING A UNIT – To move a unit, first select it, then position your cursor where you would like it to move to, then click once with the right mouse button.

ATTACKING WITH A UNIT – To have a unit attack an enemy, first select that unit, then place the mouse pointer over an enemy, where the cursor changes to a targeting reticule, and finally click once with the right mouse button.

ATTACK MOVE – Units given an Attack-Move order will engage any enemies they encounter while moving. They will also make better use of cover. To issue an Attack-Move order, first select a unit. Next, click on the Attack-Move icon with the left mouse button, and finally click on the unit’s destination with the left mouse button.

SUPPRESSION – Rapid-fire and sniper weapons cause suppression. When your units are suppressed, the decorator above the squad on screen blinks red and they move and fire much more slowly.

SETUP WEAPONS – Heavy weapons like Avitus’s heavy bolter require set-up time. Until that time elapses, the weapon cannot fire. Weapons set-up automatically when the squad isn’t moving. You can see the progression of the setup in the squad’s decorator.

FACING – Set-up weapons cannot rotate freely, so you must point them in the right direction. To tell a unit which way to face, first select that unit. Next click-and-hold with the right mouse button where you want the unit to move to, and drag in the direction you want them to face. Release the mouse button and the unit will move and face that direction.

USING COVER – Cover helps to shield your units from enemy fire. Green dots appearing while a unit is selected represent an area of heavy cover. Yellow dots represent light cover while white dots mean that location is not in cover. To get into cover, place your mouse pointer at the desired cover location and then give your units a move order to get there. Most objects in the world provide some form of cover. In a firefight, cover can make all the difference between victory and defeat.

CLEARING BUILDINGS – Enemies in buildings are much harder to kill. They benefit from cover and elevation. Try using frag grenades or other explosive devices to get rid of them.

USING BUILDINGS – You can enter buildings to give your units better protection. To do so, select a unit and place the mouse pointer on the building you want to enter. If your unit can enter the building, the mouse cursor will change to represent this. Finally click the right mouse button. Your units will automatically move towards the building, enter it and take up firing positions at the windows.

EXITING BUILDINGS – To exit a building, select that building then click the left mouse button on the Exit All icon.

FALLING BACK – To have your units fall back to safety, click the Fall Back icon with the left mouse button. The selected unit will run back to the closest relay you control.

BOSSES – You will face elite enemies with special powers and higher stats. These ‘bosses’ use a special health bar that appears at the top of the screen.
CAMPAIGN MODE

As a member of the elite Space Marines, forged through war into the Emperor's finest warriors, it is your holy charge to protect the galaxy against the Xenos invasion. Throughout the campaign, you will choose missions from the distress signals transmitting onto your Starmap. Wage war and purify the planets of the Imperium from the heretic Eldar, the pillaging Orks, and the ravaging Tyranids. With every mission, earn experience points towards new levels, allowing you to increase your squad’s skill and unlock amazing new abilities.

In addition, completing missions and defeating enemies will provide you with new wargear and attribute points. As the campaign progresses, dropped wargear will become more powerful and can be equipped from the Squad Screen to increase the power and abilities of the squad that equips it. Attribute points can also be spent to further increase the power and abilities of squads.

When a mission is complete, new distress signals appear for you to answer.

STARTING A SINGLE PLAYER CAMPAIGN GAME

From the Main Menu, click “Campaign”. If you have not logged on with a Live Profile, do so now. If you are logged in, you can proceed to the next screen. Choose “New Campaign”. You must then name your Force Commander and choose a difficulty, then click “Accept”. This will begin your single player Space Marines campaign.

UNIT ABILITIES

ENERGY-BASED ABILITIES – Abilities like Tactical Advance and Infiltrate require mental focus from the squad and consume energy. Energy replenishes automatically as long as the unit isn’t using one of these abilities.

GLOBAL ABILITIES – Global abilities are granted in special circumstances and represent additional support from the orbiting strike cruiser. These abilities appear in a special area and can be used without selecting a particular unit.

LIMITED USE ABILITIES – Frag Grenades, Demolition Charges, and Stimulant Packs are some of the limited use abilities available to the player. Their ability icons include a number, showing the remaining uses this mission. You can replenish these abilities by picking up supply drops.

RANGED ABILITIES – Many abilities have a range beyond which they will not function. To see this range, click on the ability’s icon. The range will appear as a dotted line on the terrain.

BATTLE CRY – Battle Cry allows the Force Commander to enhance all your nearby squads. To use Battle Cry, first select the Force Commander, then, click on the Battle Cry ability icon with the left mouse button. All your units that are within range receive a boost to their damage output and your Force Commander will become temporarily immune to knockback and perform a special attack with each melee attack.

COMBAT JUMP – To use the Assault Marines’ Jump Packs, select Thaddeus then click on Combat Jump with the left mouse button. Then click on the location you want Thaddeus to jump to with the left mouse button.

DEMOLITION CHARGES – To use demolition charges, first select the squad that has them (by default, Cyrus). Next, click on the Demolition Charge ability icon with the left mouse button, and then click with the left mouse button once more on the location where you wish to throw the demolition charge.

DROP POD ABILITY – If you are far from a secured Teleporter Relay Beacon or strategic asset and need to reinforce, you can use a drop pod. Click on the drop pod ability icon with the left mouse button. Then click on the area where you want the drop pod to arrive with the left mouse button.

FOCUS FIRE – Avitus can increase his damage output by using Focus Fire. To use Focus Fire, select Avitus and click on the Focus Fire ability icon with the left mouse button. His weapon will do more damage until you turn the ability off or he runs out of energy. To turn the ability off, just click on the icon a second time with the left mouse button.

FRAG GRENADES – To use frag grenades, first select the squad equipped with them (by default this is Tarkus), then click on the Frag Grenade ability icon with the left mouse button. (Ability icons appear to the right of the unit’s portrait in the bottom right of the screen.) Now, move the cursor to the location you wish to throw the grenade at, and then click the left mouse button once more.

HIGH POWERED SHOT – When using High Powered Shot, Cyrus will take a single sniper shot at the target, often killing it outright. Only vehicles, huge creatures and bosses are too tough to take out with a single shot. To use the ability, select Cyrus and click on the High-Powered Shot ability icon. Finally, click on an enemy unit with the left mouse button.

INFILTRATE – To use Infiltrate, select Cyrus and click on the Infiltrate ability icon with the left mouse button. Cyrus and his squad will remain invisible to the enemy until you turn the ability off or he runs out of energy. To turn the ability off, just click on the icon a second time with the left mouse button. Players who venture too close to the enemy may be partially revealed.
SUPPLY CRATES – Supply crates throughout the mission glow with a yellow aura. Within the crates are supplies. To pick up supplies from a crate, have one of your units destroy it. Then click on the supplies within with the left mouse button. This will replenish your limited use abilities such as frag grenades, demolition charges, and health packs.

WARGEAR PICKUP – Wargear is special equipment that makes your characters more powerful. Enemies will sometimes drop wargear when they die. To pick up a piece of wargear, click on it with the left mouse button. Wargear is also rewarded for completing certain missions. You will have access to wargear acquired on the battlefield or as a reward once you have completed your current mission.

MULTIPLAYER MODE

Matches in multiplayer can either be Team Battle or Head to Head. A Team Battle pits two teams of up to three players or CPU’s against each other. A Head to Head match is a match between you and one other player, either CPU or Human.

WINNING MULTIPLAYER GAMES

Victory Points - You can win the game by capturing Victory Points. The team that controls the most victory points will run down the opposing team’s Victory Counter. Win the game by running the enemy Victory Counter down to zero points. Capturing victory points makes the opposing team’s victory point counter go down. When one team’s counter reaches 0 victory points, that team loses.

Annihilate - You can take the fight directly to your opponents and destroy their bases. If you eliminate all enemy bases, you will win the match.

RESOURCES

You need requisition and power to purchase units and upgrades for your army. Capture points on the map to increase the amounts of requisition and power you are earning.

Requisition - Requisition is the primary resource used for purchasing units. Be sure to capture requisition points.

Power - Power is required for advanced units and upgrades. Capture Power Nodes to increase your Power income. You can upgrade the Power Nodes and build up to three generators at them to generate even more resources for you and your team.
Shared Resources - Your entire team benefits from capturing points and upgrading Power Nodes. If you don’t have enough requisition to upgrade your Power Nodes, ask your teammates to upgrade them. They benefit equally from a fully upgraded Power Node.

Stealing Upgrades - The enemy can capture a Power Node and steal your upgrades if you aren’t defending them. Be careful to protect your economy!

MULTIPLAYER CONVENTIONS

Global Abilities - Each race has a global resource earned in battle by fighting, capturing points, killing, and dying. This global resource of Space Marine Zeal, Ork Waaagh!, Eldar Psychic Might, or Tyranid Biomass can be used to activate powerful global abilities which can be used at anytime anywhere revealed in the fog of war.

Headquarters - Upgrading your headquarters grants access to new unit types and can make your existing units more powerful. Your headquarters has two possible upgrades.

Rally Point - Click the Rally Point button to set a rally location. You can designate either a location or a unit as your rally point. All newly constructed units will run to the rally location.

Earning Experience - You earn experience by killing enemies and supporting your team mates. As you earn experience, your army and commanders will level up and become more powerful.

Knocked out - When a commander falls he can be revived by his teammates. If you revive a friendly commander, you earn experience.

Reviving your own commander - Sometimes your teammates won’t be able to revive your commander. Select your fallen commander and press the Revive button that appears. Your commander will reappear back at your base. Reviving your commander costs requisition, but the price will fall over time.

Wargear and Upgrades - Commanders have several upgrades available to them, and can equip a weapon, armor, and accessory piece. Upgrades can make you stronger, grant abilities, or make you more effective against different types of enemies. Select your commander to see your available upgrades.

Squad and Vehicle Upgrades - Squads and vehicles also have some upgrades available. Some upgrades offer new weapons, others add new units to squads. Select your units to see their available upgrades.

Work together - Teams that work together will be far more powerful than those that don’t. Talk to your teammates to let them know what you are doing! Make coordinated assaults against the enemy team, protect your economy, and take advantage of each of your commanders’ strengths.
