LET THEM BREATHE

+

HELLO MOTHER

Mrs. Chen was sent back to Tokyo University when she received a call one day. She learns the experiment team wants her to collect notes and documents left behind by the previous scientist. Help Mrs. Chen collect all of the documents so as she may turn them in, and get back home to her sons.

Throughout the area, there are recordings that can be listened to.

These recordings are from the scientist and her test subject. Learn more of what was taking place down below in the forsaken labs.

Mrs. Chen is the mother of Jesse Chen; Jesse Chen is one of the main characters of Let Them Breathe web series that was featured on YouTube. Jesse is also the main character of the upcoming independent movie, Let Them Breathe: City on the Ocean.

Word from the creator:

"I'd like to thank those for playing this game. It's short but free. It allows people to learn more about the lore of Let Them Breathe. I'm looking forward to creating more complex games in the future, and bringing more characters to life to tell this wonderful story. Again, thanks for your support. Also, this is a fun game for speed running. The first time around, the game will probably take a player an hour, if that, and it'll be cool to see just how fast they get with time. I think my fastest time was about 4 minutes."
