

dataVizVR (0.4.0.0)

.csv files must be placed in the same file path as the .exe in the folder located at `~/datavizvr_preview/datasets`

The trigger button on the motion controller is used to interact with menus and the trackpad is used to scroll on the menus

Individual data points in a scatter plot can be inspected by simply aiming your laser pointer at the desired point with the end of the controller

Variable assignments for X, Y, Z and Size, Label & Color work and are all interchangeable with Numeric or Alphabetical variables

\* KNOWN BUGS \*

- Very large datasets (over 5,000) may introduce some lag
- Folder Containing Datasets can not yet be selected dynamically
