The Brief Basics!

I'm not going to cover everything here... the controls are typical of an RPG. If you're confused about something, feel free to email me. The nontypical-ish stuff is listed below:

Toggle Fullscreen and Zoom with F5 and F6

Press F1 to Remap Controller/Keyboard

Press Q and W (default) together to run from battle

On world map, press A (default) to view minimap

Press ESC (default) to access menu with other help and options.

There are portions of the game that you will need to use the action key (default 'Z') to jump across gaps. This should be obvious, but in case it isn't, when in doubt, use your action button!

There is a known bug on certain maps where if you begin running as soon as the battle loads, the game will crash. To avoid this bug, please wait for the battle to fully load before attempting to run from it.
