### IMPORTANT NOTE REGARDING GRAPHICS AND HAVING THE BEST POSSIBLE EXPERIENCE

*Tomb Raider: Anniversary* uses some of the most advanced rendering techniques available today for special effects and to achieve real-time performance for a great game playing experience. The game was largely developed and tested on NVIDIA GeForce 7 Series graphics cards. On a GeForce 7600 or better you will be able to turn on all of the special effect features at higher resolutions in the game. The intended experience can be more fully realized on NVIDIA GeForce 8 Series graphics hardware.

## LARA

*At the age of nine, Lara survived a plane crash in the Himalayan mountains that led to the death of her mother. After miraculously surviving a ten-day solo trek from the crash site to Kathmandu, she spent the rest of her childhood under the close tutelage of her Archaeologist father — the late Earl of Abbingdon, Richard Croft.*

*At the age of eighteen, after the death of her father, Lara inherited the Croft estates and became Countess of Abbingdon. Since then she has been pursuing her own personal mission to uncover the secrets of the world's distant past and in doing so, hopes to understand how her parents died.*

## GETTING INTO THE GAME

### STARTING A NEW GAME

Once you create a profile, you proceed to the Main Menu. If you're ready to start your adventure with Lara, select *Start Game*. If you'd prefer to learn how to control Lara in a less dangerous environment, select *Play Croft Manor* to explore Lara's home.

### DIFFICULTY SETTING

When you start a new game, an Options screen appears, allowing you to set a game difficulty level: *Easy*, *Medium* (default) or *Hard*.

- ▼ Difficulty is set at the beginning of the game, and cannot be changed during your adventure. Once you beat a level, you can replay it at any difficulty level.

### SAVING & LOADING THE GAME

#### SAVING YOUR PROGRESS

Every game level has game save checkpoints. The word *Checkpoint* appears at the bottom of the screen when Lara passes a checkpoint.

- ▼ The game uses an Autosave feature that saves your progress every time Lara passes a checkpoint. (Starting a new game automatically overwrites the autosave.)
- ▼ To save manually at any time, press *Esc* to access the Pause Menu, and select *Save*. You can save between checkpoints, but Lara will always appear at the most recently passed checkpoint when a save is loaded.

#### SAVING REWARDS

When you replay a level, the *Save Rewards* option becomes available. This stores any rewards you've picked up, though it does not save your location within a level.

#### LOADING A SAVED GAME FROM THE MAIN MENU

Once you have a game in progress and data saved, *Start Game* in the Main Menu will be replaced by *Play Game*. Select this to resume your most recent save, load saved games, or replay completed levels.

### CLIMBING, JUMPING, GRABBING & SHIMMYING

Lara is a superb climber and can overcome most obstacles using jumps, grabs and shimmies.

- ▼ To shimmy along a ledge or object, press the **cursor keys** in the direction you want to go. Tap the E key repeatedly to speed up the shimmy. To pull up, press the **spacebar**.
- ▼ Press the **left shift key** to release from the grab and drop down.
- ▼ To perform a jump (side/back/up) on ledges, press a **cursor key** in the direction you want to go, then press the **spacebar** to jump.

## GRAPPLING & WALL RUNNING

Lara can also use her grapple device to span gaps too wide for her to jump across. Where you see a hanging or wall-mounted ring, you can use the grapple device to swing across or wall-run to safety.

- ▼ To activate the grapple device, run toward the ring, press the **spacebar** to jump, then immediately press the **Q** key to throw the grappling hook.
- ▼ To climb or descend the grapple line, hold the **E** key and press the **cursor keys** **↑/↓**.
- ▼ Lara can only climb up and down on her grapple line when she is not swinging. To swing or wall-run, press a **cursor key** in the direction of your destination, then press the **spacebar** to jump and release the grapple device.

## POLE TECHNIQUES

Using poles, Lara can jump from point to point across gaps, or overcome obstacles and gain access to areas she is unable to climb to.

- ▼ Use the **cursor keys** to move Lara into position under the pole, or take a run up using the **cursor keys** and press the **spacebar** to jump onto the pole.
- ▼ Press **↑** and hold to begin swinging, then press the **spacebar** to leap off.
- ▼ When Lara is hanging stationary from a pole, use the **cursor keys** to adjust her position on the pole.
- ▼ Press the **spacebar** to release from a pole.

## COLUMN TRAVERSAL

Lara can climb slender vertical columns to reach areas above and below her.

- ▼ Use the **cursor keys** to move Lara onto the base of a column, or take a run up using the **cursor keys**, then press the **spacebar** to jump onto the column.
- ▼ Press the **cursor keys** **←/→** to rotate Lara around the column. Press **↑/↓** to make Lara climb up or slide down the column.
- ▼ To jump off a column, press a **cursor key** in the direction you want to jump, then press the **spacebar** to leap off.
- ▼ Press the **left shift key** to release from a column.

## ROPE WORK

Lara uses ropes to span gaps too large to jump across.

- ▼ Use the **cursor keys** to move Lara into position under the rope, or take a run up using the **cursor keys** and press the **spacebar** to jump onto the rope.
- ▼ Climb and descend the rope by holding the **E** key and pressing the **cursor keys** **↑/↓**.
- ▼ Press **←/→** to rotate Lara around the rope, changing her swing direction.
- ▼ Press **↑/↓** to build momentum and swing Lara higher, then press the **spacebar** to jump to the next rope or platform.
- ▼ Press the **left shift key** to release from a rope.

## LADDERS

Lara can climb up and down ladders to traverse large vertical spaces.

- ▼ Use the **cursor keys** to move Lara into position under the ladder, or take a run up using the **cursor keys** and press the **spacebar** to jump onto the ladder.
- ▼ Press **↑/↓** to climb or descend the ladder. Tap the **E** key repeatedly to speed up Lara's movement.
- ▼ Press the **spacebar** to jump backward off a ladder. To perform a lateral jump off a ladder, press a **cursor key** in the direction you want to jump, and then press the **spacebar**.
- ▼ Press the **left shift key** to release from a ladder.

## PERCHING

Lara can jump onto and perch on the tops of very small platforms — usually the tops of slender columns.

- ▼ Press the **spacebar** to jump to a perchable object. Once connected and steady, press the **cursor keys** **←/→** to rotate.
- ▼ To jump off, press a **cursor key** in the direction you want to jump, then press the **spacebar**.
- ▼ If Lara lands incorrectly on a perchable object, she will lose her balance and begin to fall off. Quickly press the **E** key to regain balance and steady Lara.

▼ You can make Lara hop rapidly across the tops of perchable objects by pressing the **spacebar**, then, as soon as she lands, pressing a **cursor key** in the direction of the next jump. You have a limited amount of balance time; so get Lara onto a stable perch as quickly as possible. If Lara begins to waver while on a perchable object, press the **E** key to regain balance.

### SWAN DIVE

Lara can swan dive off rock faces into water.

▼ Use the **cursor keys** to control Lara's direction, then tap the **spacebar** and **left shift key** in quick succession.

### INTERACTING WITH THE ENVIRONMENT

Lara interacts with the environment in many different ways: opening doors, moving obstacles, and activating levers.

▼ To interact with an object, stand next to it and press the **E** key.

### KNOWDOWN RECOVERY

When Lara is hit by a strong enemy attack, she will stumble, then fall to the ground.

▼ When Lara is stumbling, quickly press the **spacebar** to stop her from falling and flip back up.

### TUMBLING

Lara is an accomplished acrobat who can perform lithe tumbles and flips as she moves about.

▼ To tumble, press the **left shift key** repeatedly.  
▼ To flip, press the **spacebar** repeatedly.

## BASIC COMBAT CONTROLS

### COMBAT FIGHTING

<b>right mouse button</b>	Lock onto target (enemies and shootable objects)
<b>left mouse button</b>	Fire weapon – Results in headshot if timed correctly during Adrenaline Dodge
<b>mouse</b>	Change target (flick <b>←/→</b> while locked-on)
<b>mouse wheel</b> or <b>-/+</b> keys	Cycle through weapons

### COMBAT MOVEMENT

<b>(while locked-on) cursor keys + left shift key</b>	Multidirectional roll
<b>(while locked-on) cursor keys + spacebar</b>	Somersault in direction of cursor key
<b>(during enemy's Rage Attack) cursor keys + left shift key/spacebar</b>	Adrenaline Dodge

## ADVANCED COMBAT CONTROLS

### ADRENALINE DODGE

During combat, some enemies will become enraged, charge at Lara and perform a Rage Attack. When this happens, Lara's Adrenaline kicks in to respond to the threat, and the screen blurs to indicate Lara can now perform an Adrenaline Dodge.

▼ Press the **left shift key** or **spacebar** while using the **cursor** keys to perform a dodge and evade the attack. If done correctly, Lara will go into slow motion and have the opportunity to return fire and deliver a headshot to the enemy.

▼ To successfully execute a headshot, wait until the two targeting reticles superimpose over the enemy's head, then press the **left mouse button** to shoot. (If Lara shoots before the two reticules overlap, she will not perform a headshot.)

Adrenaline Dodges are special evasive moves only available in response to Rage Attacks. Timing is critical! If Lara dodges too late, an enemy can still hit her. With practice though, using Adrenaline Dodges can significantly increase Lara's chances in combat.

## BREAKING FREE FROM ENEMY GRABS

Some enemies can grab Lara's limbs and shake her around. If an enemy latches onto Lara in this way, quickly press the **cursor keys** **←/→** to break free from the animal's grasp. The faster the keys are pressed, the faster Lara will break free.

▼ Press both **cursor keys** simultaneously to break free more quickly.

## COMBAT STRATEGIES

### MOVEMENT

Keeping Lara moving is the most important factor in combat; a moving target is much harder to hit than a static one.

### TARGETING

The targeting reticle appears when a target is within Lara's sight. The color of the reticle changes depending on the target's status:

- ▼ **Red** — Target is within range at its current distance.
- ▼ **Gray** — Target is out of range.

When locked-on to an enemy, the targeting reticle displays four arrows in addition to the normal targeting ring.

- ▼ If the target is within distance but out of the field of view, an arrow at the side of the screen will appear, showing you the direction in which the target is located.

## HEADS-UP DISPLAY (HUD)

- 9 Enemy Rage Meter** Rage level of select enemies.

## TECH SUPPORT

**NOTE: OUR SUPPORT AGENTS DO NOT HAVE AND WILL NOT GIVE GAME HINTS STRATEGIES OR CODES**

### CONTACTING TECH SUPPORT

If you have a technical problem with the game, our Support Department is here to help. Our web site contains up-to-date information on the most common difficulties with our products; this information is the same as that used by our support agents. If you are unable to find the information you need on our web site, please feel free to contact us via email, fax, telephone or letter. (When contacting us via email or fax, please be sure to put the game title in the subject of your message.)

### ASSISTANCE VIA THE WORLD WIDE WEB

The fastest way to answer most questions is by visiting our online support. You can find the latest support information at <http://support.eidosinteractive.com/>. Our support FAQ's are available 24/7 for your convenience. These pages are updated frequently and have the same information that our support techs will use to answer your question if you call or email us. The answers to about 90% of the questions we are asked can be found there, so it really is worth the time to take a look!

The second fastest way to get an answer to your question is to email us. (You will find our email submission forms at our web site.) We typically respond to email queries within 24-48 hours during the business week. Response times can be considerably longer over the weekend, holidays and immediately after a product release. It all depends on how many people we have working and how much email is coming in at any one time, but we do try really hard to get you the right answer as quickly as possible. Weekdays, excluding holidays, during the hours

when the phones are open, we still give email questions our highest priority. Through this site you will also have access to our FTP area where you can download patches and new enhancements as soon as they become available.

### ASSISTANCE VIA TELEPHONE OR FAX

We are available to take your calls Monday through Friday, 9:00 a.m. – 12 noon and 1 p.m. – 5:00 p.m., Pacific Time at (650) 421-7670. Our tech support department is closed on all major holidays.

**Note: You are responsible for all toll charges when calling.**

To ensure the quickest service you will need to be at your computer and have the following information at hand:

- A complete listing of your computer's hardware. (Contact your computer manufacturer if you are unsure.)
- What version of Windows® you are using.
- A copy of your DirectX Diagnostics report.
  1. Click *Start*.
  2. Click *Run*.
  3. Type *dxdiag*.
  4. Click *OK*.
  5. Click the *Save Information* button and save the file to your computer.
  6. When you call our Technical Support line, either have this file open or have a printed copy. If you send an email query you may attach the file to the email.
- What error message(s), if any, you have had.
- How the game is currently configured.
